

RapidHeat™ Oven

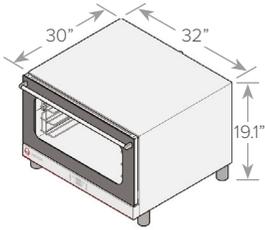

NEW RapidHeat™ THERMOPLASTIC OVEN

The RapidHeat™ Oven quickly reaches working temperatures and provides an easy to use method to heat Aquaplast RT™ and Fibreplast™ thermoplastic masks as well as Aquaplast RT™ Custom Bolus™. The unique design allows the hot air to envelop the thermoplastic to soften quickly and evenly. This reduces the overall mask making time. The RapidHeat™ Oven features an easy to read digital timer and temperature control. The two sliding racks boast a non-stick coating which reduces the potential for sticking of the thermoplastic. The large interior of the oven has the ability to heat multiple masks simultaneously. For added safety the RapidHeat™ Oven automatically shuts off after 2 hours of inactivity.

Digital Display

RapidHeat™ has a large 7.5 cm high digital display that features a Quick Start Guide to help easily navigate operating the oven. The digital temperature control can be used in a programmable or manual timer mode, increasing work flow efficiencies. The arrow indicators adjust time/temperature and the Start/Stop function allows you to easily preheat the oven while prepping your patient. The digital display includes a timer that counts down from the designated time and alerts you when ready. The time can be set accordingly for different masks and Aquaplast RT™ Custom Bolus™.

Outer dimensions: 81.3w x 76.2d x 48.5h cm
Inner dimensions: 68.6w x 53.3d x 25.4h cm

THERMOPLASTIC PREP CART

The Thermoplastic Prep Cart is ideal for organising, storing and transporting the RapidHeat™ Oven, Aquaplast RT™, Fibreplast™ and accessories. It is made from easy to clean stainless steel and includes two shelves for additional storage.

OIS is the distributor for Qfix in the UK & Ireland.
RapidHeat, Aquaplast RT, Fibreplast and Custom Bolus are trademarks of Qfix Systems.
